

Job title: Electrical and Mechanical Assembler
Department: Assembly

The company:

STS is a small innovative company focussed on manufacturing specialist high-quality drum handling equipment. The company has 23 staff and is growing steadily, expanding each year. The company supplies equipment into a wide range of industries including Paint, Chemical, Pharmaceutical and Food. We manufacture in steel and stainless steel with lifting capacities ranging from 20kg to 2000kg. Much of our equipment utilises electric, hydraulic and pneumatic systems to offer powered functionality.

The role:

We are recruiting an Electrical and Mechanical Engineer to work in our purpose-built factory. The role involves the complete assembly of mechanical handling equipment as well as the installation of hydraulic, electrical and pneumatic circuits.

Main purpose of role:

1. Assist to increase the level of output from our assembly department.
2. Produce lifting equipment with a high attention to detail.
3. Communicate with team members and add to a strong dynamic team.
4. Work to provide customers with the highest quality handling equipment available.

Key tasks:

1. Assemble lifting equipment according to engineering drawings and procedures.
2. Install hydraulic and pneumatic-hydraulic circuits for lifting equipment.
3. Install electrical circuits and components for lifting equipment.

Key skills required:

1. Natural technical ability and an interest in engineering.
2. Internal drive to always improve and make things more efficient.
3. Good communication and people skills.
4. Organised approach to technical problems.

Qualifications required:

1. Qualifications in electrical fields (required).
2. Qualifications in mechanical fields (desirable).
3. 18th Edition electrical wiring qualification.
