Bespoke drum catches

Here at STS we can design and incorporate bespoke catch arrangements for unique handling applications. Our drum depalletiser models are designed to handle a wide range of drums ranging from 50 to 220 litre. Occasionally a special drum type needs to be handled in industry with an unusual shape, construction or capacity; should this be the case we take pride in being able to offer a safe handling solution. Please get in touch to discuss your requirements.
